5 ChatGPT Prompts to Improve Your Supply Chain

A Practical AI Playbook for Supply Chain, Procurement & Risk Leaders

Z2

1 Identify Hidden Risks

RISK MANAGEMENT

"Act as a supply chain risk expert. What are the most common hidden risks in global supply chains today across suppliers, logistics, compliance, and geopolitics? For each risk, explain why it's often missed and how companies can proactively detect it."

Move beyond the prompt with Z2:
Z2Data monitors 120+ risk types across 700,000+ suppliers in real time. Automatically surfaces sub-tier vulnerabilities, sanctioned entities, and emerging threats with instant impact analysis.

2 Evaluate Suppliers

PROCUREMENT

"You are a procurement strategist. What criteria should companies use to evaluate suppliers beyond cost and lead time? Include factors related to financial stability, compliance, geographic risk, sustainability, and resilience."

Move beyond the prompt with Z2:
Automated supplier scoring across financial health, ESG, cybersecurity, and 10 additional risk factors. Compare 700,000+ suppliers instantly with pre-built or custom assessment frameworks.

3 Resilience Planning

STRATEGY

"Act as a supply chain resilience consultant. How should a company design a resilience strategy to prepare for disruptions such as geopolitical conflict, natural disasters, supplier insolvency, or regulatory changes?"

Move beyond the prompt with Z2:
Model factory shutdowns, regional instability, or supplier failures. Quantify revenue at risk and assess alternatives with live intelligence.

4 Compliance Readiness

COMPLIANCE

"You are a compliance expert. What are the biggest regulatory risks facing global supply chains today (trade, ESG, forced labor)? How should companies monitor and manage these effectively?"

Move beyond the prompt with Z2:
Ingests supplier documentation, validates data, identifies gaps, and generates audit-ready certificates across products and parts.

5 Data Into Insights

ANALYTICS

"Act as a supply chain analytics advisor. How should supply chain data be translated into clear, executive-level insights that support better decision-making? Provide examples of KPIs and dashboards."

Move beyond the prompt with Z2:
Transforms raw data into actionable scorecards. Track risk trends, compliance status, and supplier performance.

Move beyond prompts with deep visibility into supplier risk, compliance, financial health, and multi-tier exposure with Z2Data.
